

HOW TO SELECT THE RIGHT KEYSTONE

01 Category matching

- Determine the category of the keystone (Cat.5e, 6, 6A, 7, 8).
- Select a keystone module that corresponds to the same or a higher performance category as the other network components.

02 Module variant

Keystone modules have a front and a rear side.
The front always has an RJ45 socket.
Rear: LSA strip or RJ45 connection
For LSA variants: Click in the wires of a network cable

03 Design

The choice of the correct design depends on the specific requirements of your installation.

- Normal: standard size, versatile applications
- Slimline: slimmer design, for areas with limited space
- Shortbody: Compact and space-saving, applications with low installation depth
- Slimline & Shortbody: Combination of slimline and compact design, maximum flexibility

04 Shielded vs. unshielded

Versions: shielded (STP) or unshielded (UTP)
Match the choice of shielding to your cables
UTP keystones for UTP cables and
STP keystones for STP and FTP cables

HOW TO SELECT THE RIGHT KEYSTONE

05 Location

Some Keystone modules offer additional features such as dust caps for unused ports and angled mounting options.

- Consider the environmental conditions (e.g. industrial environments).
- Harsh or industrial environments: Use of an additional enclosure with IP protection class possible (protection against environmental influences).
- Check specific performance factors such as Power over Ethernet (PoE) support.
- Network with PoE-capable devices: Select keystones for PoE applications.
- Are additional functions required (e.g. dust caps for unused connections and angled mounting options).

06 Compatibility with network components

- Check compatibility with selected accessories.
- When using cavity boxes: Check the depth of the keystone (short body variant).
- Check whether you need Slimline or modules with a normal design for your frame sets.
- Check whether you need Slimline or modules with a normal design for your distribution panels.

KEYSTONE OVERVIEW

EVERYTHING AT A GLANCE

RJ45 Keystone Slimline/ Shortbody Cat.6A

Perfect for confined spaces thanks to its slim and short design

| | |
|--------------------|--------------------|
| Item no. | E-20094 |
| Category | 6A (IEC) |
| Design | Slimline/Shortbody |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Captive |
| GHMT certification | |

RJ45 Shortbody Keystone STP, Cat.6A 500MHz with internal shutter

Compact design

| | |
|--------------------|-----------------|
| Item no. | E-20093 |
| Category | 6A (IEC) |
| Design | Shortbody |
| Shielding | Yes |
| PoE | PoE, PoE+ |
| Dust cover | Yes, integrated |
| GHMT certification | |

RJ45 Keystone STP, Cat.6A, 500MHz, components certified

Bestseller with great value for money

| | |
|--------------------|------------------|
| Item no. | E-20070 |
| Category | 6A (IEC) |
| Design | Standard |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Yes |
| GHMT certification | |

RJ45 Keystone STP, Cat.6A, 500MHz, components certified, earthing

Ideal for standard installations

| | |
|--------------------|------------------|
| Item no. | E-20091 |
| Category | 6A (IEC) |
| Design | Standard |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Captive |
| GHMT certification | |

KEYSTONE OVERVIEW

EVERYTHING AT A GLANCE

RJ45 Keystone STP, Cat.6, 250MHz

The solution
for Cat.6

| | |
|------------|------------------|
| Item no. | E-20072 |
| Category | Cat.6 |
| Design | Standard |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Yes |

RJ45 Keystone STP, Cat.8 Class 1

The Cat.8
expert

| | |
|------------|------------------|
| Item no. | E-20092 |
| Category | Cat.8 Class 1 |
| Design | Standard |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Captive |

Channel Class I Force Technology certified

INFRALAN® Keystone Slimline, Cat.6A, silver

The solution
with PVP certification

| | |
|------------|------------------|
| Item no. | IKS-6A-PVP-12 |
| Category | 6A (TIA) |
| Design | Slimline |
| Shielding | Yes |
| PoE | PoE, PoE+, 4PPOE |
| Dust cover | Yes |

PVP-certification , GHMT certification

RJ45 Keystone Slimline, Cat.6A, zinc alloy

Slim design

| | |
|------------|-----------|
| Item no. | E-200100 |
| Category | 6A (IEC) |
| Design | Slimline |
| Shielding | Yes |
| PoE | PoE, PoE+ |
| Dust cover | Yes |

GHMT certification
